

6 Port 100M AI PoE Switch

[Introduction]

6-Ports 100M Ethernet Power Switch (PoE Switch), using high-quality high-speed network IC and the most stable PoE chip, PoE Port support 802.3af and 802.3at standard both, this series of PoE Switch can be 10/100M Ethernet The network provides a seamless connection, and the PoE power port can automatically detect and power the powered devices that comply with the IEEE802.3af or IEEE802.3at standards. The non-PoE device intelligently detects no power and only transmits data.

PoE is Power over Ethernet, which refers to the transmission of data signals to some IP-based terminals (such as IP phones, wireless access APs, network cameras, etc.), but also provides DC power for this device. Technology, these devices that receive DC power are called powered devices.

With simple and convenient installation and maintenance methods and rich business features, it helps users to build a safe and reliable high-performance network. It is mainly located in the core or convergence layer of user networks such as industrial parks, buildings, factories and mines, government agencies, and residential broadband; it can be widely used in Ethernet access scenarios such as small and medium-sized enterprises, Internet cafes, hotels, and schools.

[Main Features]

- ➤ 4*10/100M POE ports + 2* 10/100M Ethernet Uplink ports;
- Comply with IEEE 802.3, IEEE 802.3u, IEEE802.3af/at standards;
- ➤ Ethernet port supports 10/100M adaptive and POE functions;
- Flow control mode: full-duplex adopts IEEE 802.3x standard, half-duplex adopts Back pressure standard;

- Support port auto flip (Auto MDI/MDIX);
- Automatically supplied to adaptive devices:
- Panel indicator monitoring status and help failure analysis;
- Support for VLAN mode, OFF mode and Extend mode;
- Support Watchdog Function;
- Lightning Protection Surge: General Mode 4KV, Differential Mode 2 KV, ESD 8KV(Air),6KV(Contact).

[Application Environment]

- Metro Optical Broadband Network: Data network operators such as telecommunications, cable TV, and network system integration, etc.
- Broadband private network: Suitable for financial, government, oil, railway, electric power, public security, transportation, education and other industries
- Multimedia transmission: Integrated transmission of images, voice and data, suitable for remote teaching, conference TV, videophone and other applications
- Real-time monitoring: Simultaneous transmission of real-time control signals, images and data

Specifications

I/O Interface		
Power	Input: AC 100-240V, 50/60Hz	
Ethernet	4 Port 10/100M PoE + 2 Port 100M Ethernet Uplink	
Performance		
Switching Capacity	1.2Gbps	
Throughput	0.8928Mpps	
Packet Buffer	448K	
MAC Address	1K	
Jumbo Frame	2Kbytes	
Transfer Mode	Store and forward	
MTBF	100000 hour	
Standard
